

Full Stack Intern

Job Description:

We are seeking a highly skilled and passionate Full-Stack Developer who can work across multiple technologies. The ideal candidate should have good understanding with JavaScript-based backend and frontend frameworks, including ExpressJS/NestJS/Loopback and ReactJS, while adhering to industry best practices for scalable and maintainable development.

Requirements:

- Should have knowledge of technologies such as NestJS/ExpressJS/Loopback and ReactJS.
- Should have a good understanding of with relational databases such as PostgreSQL or MySQL.
- Should have done projects using technologies such as NestJS/ExpressJS/Loopback, PostgreSQL/ MySQL, and ReactJS
- Skilled in structuring frontend and backend codebases from scratch and committed to writing clean, maintainable, and efficient code.
- Proficient in analyzing and interpreting complex project requirements.
- Strong communicator with a collaborative mindset.
- Quick learner with effective leadership abilities.
- Should have a knowledge of version control systems like Git.

Responsibilities:

- Spearheading end-to-end product development, ensuring seamless integration and optimal performance across both frontend and backend ecosystems.
- Establishing and configuring projects from inception, laying a strong foundation for both frontend and backend frameworks.
- Orchestrating the deployment of products on cloud platforms such as AWS, Azure, GCP, and Digital Ocean, ensuring reliability, scalability, and security.
- Continuously exploring and adopting emerging technologies to meet evolving product requirements and drive innovation.
- Strengthening team collaboration by fostering effective communication, critical thinking, and strategic input in project design and execution.

Good to have skills:

- Knowledge of any backend frameworks such as Django, Flask, and Spring Boot.
- Familiarity with Artificial Intelligence and Machine Learning concepts.
- Hands-on experience with CI/CD tools for streamlined development and deployment.
- Familiarity with testing and automation frameworks to ensure software reliability and efficiency.

Required Qualification - M.Tech, BE/B.Tech, MCA, BCA

Internship duration - 6 months

Work Location - Baner, Pune, Maharashtra.

Stipend - 10,000 INR

PPO - 3 lakhs to 5 lakhs (depending upon performance)

Coding Challenge: https://drive.google.com/file/d/1GR1_yrSJgXc4vcBEjX2W_LwUFAYgLb7x/view?usp=sharing

Note -The conversion into a full-time employment will be based on the performance during the 6 months of internship.
